

Computer Graphics and Animation Lab Answers (Turbo C + Flash)

16. Working with Bitmap Images and Sounds on Background

- Step 1: Open Adobe Flash and create a new Flash document.
- Step 2: Go to File > Import > Import to Stage.
- Step 3: Select your bitmap image (e.g., .jpg, .png) and click Open.
- Step 4: The image appears on the stage. Resize and place it as needed.
- Step 5: To import sound, go to File > Import > Import to Library.
- Step 6: Select the audio file (.mp3, .wav) and click Open.
- Step 7: Drag the sound from Library to the timeline's keyframe.
- Step 8: Set sound properties using the Properties Panel.
- Step 9: Use Control > Test Movie to preview with image and sound.

17. Perform Frame by Frame Animation in Flash Interface

- Step 1: Open Flash and create a new document.
- Step 2: Draw the first object on Frame 1 using drawing tools.
- Step 3: Right-click on Frame 2 and select 'Insert Blank Keyframe'.
- Step 4: Draw a slightly changed object on Frame 2.
- Step 5: Repeat this process for as many frames as needed.
- Step 6: Press Enter or Control > Test Movie to see the frame-by-frame animation.

18. Perform Shape Tween in Flash Interface

- Step 1: Open Flash and draw a shape (e.g., circle) on Frame 1.
- Step 2: Right-click Frame 20 and select 'Insert Keyframe'.
- Step 3: Modify the shape in Frame 20 (e.g., change to square).
- Step 4: Right-click anywhere between Frame 1 and 20 and choose 'Create Shape Tween'.
- Step 5: Press Enter to preview the tween.

19. Perform Motion Tween in Flash Interface

- Step 1: Draw a symbol (e.g., convert shape to Movie Clip using F8).
- Step 2: Place it on Frame 1 and set starting position.
- Step 3: Right-click Frame 30 and choose 'Insert Keyframe'.
- Step 4: Move the object to a new position on Frame 30.
- Step 5: Right-click anywhere between Frame 1 and 30 and choose 'Create Motion Tween'.
- Step 6: Press Enter to see the motion tween in action.
